Your investment needs may be different depending on the age of your child. That is why we have created 2 plans for you to choose from.

Gift Plan

Consider this plan if your child is in the age group of 1-13 years and you are looking to save over a long term horizon. As we all know, equity investments have potential to perform better if invested for a long term. So this plan invests 65-100% of your money in equity and equity related securities. The other 0-35% is invested in Debt Securities, Money Market Instruments, Securitised Debt & Cash to lend stability to your investments.

Study Plan

If your child is between 13 & 17 years and on the threshold of higher studies, then a lot of large expenses are just around the corner. Since your horizon is smaller and you need to be more sure of what your money can bring you, 75-100% is invested in debt securities, money market instruments, securitised debt & cash, while 0-25% is put in equity to provide you with the benefit of equity investing.
